# Comprehensive System Test Document

## 1.0 Basic and Advanced Text Formatting

### 1.1 Font, Size, Color, and Style Variety

This sentence is the default Calibri. **This sentence should be formatted in Arial, size 14, and colored blue**. This next one should be in *Times New Roman, size 10, and italic*. **This one is green and highlight.**

**Let's test combinations: this text is bold, underlined, italic, and colored red.** We must also check for **strikethrough**.

For technical documents, we need exponents like  $E=mc^2$  and subscripts for formulas like  $C_6H_{12}O_6$

## 2.0 Document Structure and Hierarchy

This section tests the ability to maintain structural integrity, including multi-level lists which are critical for reports.

### 2.1 Multi-Level Numbered List

- i. Initial Project Scoping
- ii. Phase 1: Research & Development

- a. Market Analysis
  - i. Competitor review
    - 1. Customer surveys
    - Prototyping
  - iii. Phase 2: Deployment

## 2.2 Multi-Level Bulleted List

- Primary Stakeholders
  - Executive Team
  - Lead Investors
    - Venture Capital Group A
    - Angel Investor B
- Secondary Stakeholders
  - Development Team
  - Marketing Department

## 3.0 Complex Embedded Objects

This is the most critical section, testing tables and image interactions.

### 3.1 Complex Table with Merged Cells and Formatting

Subject	Topic	Study Time	Difficulty	Notes
English	Grammar Practice	2 hours	Medium	Focus on verb tenses
Math	Algebra Equations	1.5 hours	<b>Hard</b>	Review quadratic functions
Science	Human Digestive System	1 hour	<b>Easy</b>	Summarize key processes
History	World War II		Medium	Watch documentary + take notes
Computer Science	Introduction to Programming	3 hours	Medium	Practice Python exercises

### 3.2 Image with Text Wrapping and Overlaid Shape

This paragraph of text needs to test the text wrapping feature. It should be configured to wrap **tightly** around the image that you have inserted to the left. The text should flow neatly

 along the contours of the picture, demonstrating that the layout engine respects complex positioning between text and graphical objects. This is essential for newsletters and reports.
